

JAN GRZELINSKI

Financial & Data Analyst | FinTech | Real Estate

Warsaw, Poland | grzelinskijan94@gmail.com | +48 501 493 633 | linkedin.com/in/jan-grzelinski-801116195

PROFILE

International finance professional with 7 years of corporate experience spanning equity compensation and commercial real estate. Currently manages the full administration of global employee equity award programmes (RSU, ESPP, SAYE, PSU) — grants, vesting, exercises, and cancellations — for S&P 500 clients including SAP, Coca-Cola, Barclays, AstraZeneca, and DHL. Brings 7 years of daily hands-on Excel-based financial and data analysis, strong cross-functional coordination with HR, Payroll, Finance, and Legal teams, and a growing technical toolkit spanning SQL, Python, and AI-driven automation. Former professional athlete (NCAA, Polish national youth team) — disciplined, detail-oriented, and proven under pressure in high-volume, multicultural environments.

KEY COMPETENCIES

• Equity Compensation Administration (RSU, ESPP, SAYE, PSU)	• Advanced Excel (formulas, pivot tables, financial modelling)
• Financial Reporting, Reconciliation & Data Validation	• Cross-Team Coordination (HR, Payroll, Finance, Legal)
• SQL — Data Filtering & Quality Checks	• Multicultural, International Client Management
• Process Automation & Internal Tooling	• High-Volume Operations Under Deadline Pressure

PROFESSIONAL EXPERIENCE

Vesting Specialist — Computershare

Barcelona / Warsaw | 2023 – Present

- Administer global equity award programmes (RSU, ESPP, SAYE, PSU) end-to-end: grants, vesting events, exercises, and cancellations for major international clients (SAP, Coca-Cola, DHL, Barclays, AstraZeneca, Savills).
- Produce daily financial and operational reports; validate and process high volumes of equity plan data with a strong focus on accuracy.
- Maintain accurate participant and plan data within equity management systems, including data validation, gap checks, and visibility controls via SQL.
- Act as coordination point between clients and internal teams — delegating tasks, tracking follow-through, and preparing teams ahead of key deliverables.
- Collaborate daily with international stakeholders across the UK, Switzerland, Germany, and Spain in a fully English-speaking, cross-location environment.

Business Analyst, Investment Properties — CBRE

Warsaw | 2022 – 2023

- Supported 10+ commercial real estate transactions at Poland's #1 real estate advisory firm, including Warsaw HUB (~€583M, acquired by Google — the largest office transaction in Poland), Matarnia Park (~€105M), and Wola Retro (~€70M).
- Built and maintained Excel-based financial models: rent rolls, tenancy schedules, income summaries, vacancy and delinquency tracking.
- Conducted cash flow and asset performance analysis; supported due diligence and investor reporting for international investment funds.

Analyst — Knight Frank

Warsaw | 2019 – 2022

- Analysed land and investment opportunities, assessing development potential for advisory clients.
- Supported client-facing advisory work, laying the foundation for a 7-year track record in Excel-based financial analysis.

PROJECTS — AI & AUTOMATION

Timeline Generator — process automation tool

- Web-based tool that auto-generates project timelines from an event date, accounting for working days and holidays; outputs ready-to-use Excel schedules. Deployed in production (DigitalOcean); cuts manual scheduling work by 50–80%.

Setup Check Assistant — data automation tool

- Automates processing of Excel files: extracts unique values across multiple columns and generates structured validation templates, eliminating manual copying, filtering, and formatting. Cuts manual work by 50–80%.

Flight Assistant AI

- Personal AI agent that monitors flight deals against custom user preferences, delivering more relevant alerts than standard market tools.

Obsidian + Claude Code — personal knowledge system

- Built a multi-tool second-brain workflow integrating Obsidian and Claude Code: automated note generation and organisation, voice capture (Whisper Flow), and a custom transcription pipeline turning YouTube/social content into structured notes, synced across laptop and mobile.

AI / DATA TRAINING

- "Work in AI: Become a Data Scientist from Scratch" (edu.gotoit.pl) — 5-month intensive programme covering data analysis (EDA, cleaning, preprocessing), Python (Pandas), SQL, data visualisation (Matplotlib, Seaborn, Plotly), and applied AI/ML including model deployment and Streamlit app development.

EDUCATION

Bachelor's Degree — NCAA Division I Academic & Athletic Scholarship, United States (full scholarship, ~\$50,000)

ADDITIONAL INFORMATION

- Languages: Polish (native), English (advanced), Spanish (intermediate)
- Former professional basketball player — NCAA (USA), Polish top league, Polish U-national team. International experience across Poland, USA, and Spain.
